

Two european projects (MIAS 1996-1999 and VOUE 1999-2001) in collaboration with MiTech Lab of Scuola S. Anna, Pisa, IT addressed the design and test of a prototype of surgical navigator for the following two applications :

Reconstruction of anterior cruciate ligament by a deformable arthroscopic device

Minimally invasive implant of uni-compartmental knee prosthesis

These device were also proposed for surgical training.

Collaborazione con DePuy International per lo sviluppo e la validazione clinica di un dispositivo per il bilanciamento legamentoso navigato
